Social security contributions in times of the Corona crisis

It can be assumed that the delay or timetable for repayment

Dear clients,

SVS (before SVA) – SV self-employed person – opptions

✔Reduction of the provisional contribution base

In case the current income is expected to be lower than in the third previous year, there is the possibility of reducing the provisional contribution base (up to a maximum of the respective minimum contribution base).

✔Delay or payment in installment of the SV contribution due

There is also the option of delay or payment due to timetable for repayment. These options can be used in other ways, but at the moment it can be assumed that the delay or timetable for repayment of the SVS-contribution will be approved.

✔ Late payment interest

If the payment is made too late, the SVS usually does not wait for so long and sends demand for payment or default interest. The current information is that the default interest is waived entirely or partly.

If you want to decide for one of the options, the Auditorea team will be happy to help you.

✔ÖGK (before GKK) – contribution to Social Insurance Agency for employees

With the regard to the ÖGK payments for the months February (due on March 16), March and April, there will probably be an official regulation this week declaring that there will be no default interest / late payment penalties for late payments. We will keep you updated about the details.

In the case of agreed short-time work and the special provisions for contributions the short-time changes will be applied too.
